Enter the keygen directory: `cd C:\Users\Acer\Downloads\Autodesk\AutoCAD` go into the `tools/keys` directory. press `SHIFT+F10` at the same time. The tool will start, then you have to press several times the `ENTER` button, for example 8 times in a row. If it doesn't work, you can always use the `autocad.reg` file to generate a new key. As a result, many people got in touch with me about this picture, with some people telling me that it inspired a great laugh with their friends. I was very sorry that happened and in a follow up post I tried to make amends by posting the original picture. As it turns out, posting to a personal site which is not meant to be used that way, is just as
