vMaps For PowerPoint Full Product Key Free Latest

vMaps for PowerPoint is a powerful and free Microsoft PowerPoint add-in that enables you to insert maps of the world, regions and continents to your PowerPoint presentations. With the help of this add-in, you can easily and quickly add detailed maps of the entire world, regions or the country and its surrounding areas. Moreover, the add-in allows you to create heat maps from Excel files, and automate the whole process of inserting maps to PowerPoint presentations. Technical Specifications: * Length: 5.00 MB * Version: 2016.08.15 * Size: 9.86 MB Description: Add, modify, or delete the visuals of your PowerPoint presentation as if you were making a series of adjustments in Photoshop or Illustrator. The PowerPoint

Template Utility provides real-time feedback and automatic guidance as you make changes to the look of your presentation. Create and modify basic shapes and lines, then customize the size, color, and background of text boxes. Main features: * Generate PowerPoint slides with pre-placed objects, shapes, and text boxes in less than 3 minutes. * Automatically place multiple objects on one slide. * Create table layouts, borders, bullets, and lists with slide-based layouts. * Add shapes such as arrows, crosses, stars, and maps. * Move, resize, and flip multiple objects using a single mouse move. * Adjust the distance and transparency of objects and fonts. * Add shapes, borders, and backgrounds, using a layered approach, to create complex graphics. * Manage styles and colors for text boxes, shapes, and borders. * Add movie clips, music, and sounds directly from the tool palette. * Attach and remove

the selected items of an existing table to a new slide. *
Automatically convert PowerPoint files to Web pages. *
Launch PowerPoint directly from the tool palette. * Export
the PowerPoint file as an image. * Save the PowerPoint
file with several options. * Quickly customize themes. *
Automatically generate themes from multiple PowerPoint
file formats. * Run the PowerPoint automation wizard
directly from the tool palette. * See a list of pre-placed
object, text box, and shapes. * Quickly add visuals with
symbols, arrows, and hotspots to presentations. * Add
PowerPoint themes, styles, and color schemes. * Quickly
create PowerPoint slides. * Easily convert PowerPoint files
to Web pages. * Compress PowerPoint files to sizes
ranging
