Description: • What is the best way to play a new RPG, "The Elden Ring"? By bringing the RPG genre to a 3D world, and further adding the cinematic element, we were able to make a fantasy RPG that greatly appeals to players of all ages. The game gives everyone a different play experience: adults as well as children will be able to live a story full of vivid battle scenes without blushing. You can feel as if you're playing a movie, and you can easily sympathize with the story without having to think too hard. In such a short story, and with its impact-packed adventures, the battle scenes are a must. To that end, we developed the "Siege Battle", where the player can enjoy the thrill of crushing thousands of monsters with one swipe of their sword or one clap of their right hand. The battle scenes were a great hit among players. We also incorporated the "Command Battle", which allows the player to choose from a variety of situations in which the player has complete control over the enemy and can lead the player's party into the most exhilarating battles. • Why did you create a fantasy game with the Cinematic element? The reason I created the fantasy game was because I wanted to create a game that can appeal to all ages. I tried to create a game in which the players can understand the basic concepts without having to think too hard. In this fantasy game, players can understand the story while enjoying the incredible beauty of the game's setting. My goal was to create a beautiful game that can entertain people of all ages. • In a new fantasy RPG, what are the appropriate roles for the player? In a new fantasy RPG, the heroes (the main characters) are placed in the center, and the party members accompanying them are placed around them. In this game, the players actively join in the active battle. The "Elden Ring" is composed of elements at the center, and the party members are positioned on the periphery. In this way, I managed to make the players take a more active role in the game. Therefore, we positioned the player at the center and the party members at the periphery. • How do you expect the new fantasy RPG to go in the future? The new fantasy RPG is an RPG that stimulates
