Ajedrez una tarde de Otoño has been produced by the mixed team that wrote the short story La Terculia. It's an animated chess game, you play a woman against a man wearing a cowboy hat. The rules are: the guy puts the lady in a place that is convenient for him. When a piece is captured, it flies into a screen and the take positions again, without losing the rest of its pieces. To win, you must get all the checkmated chessmen. As every chess game the pieces are represented by a chalice. The pieces have been designed by Jaime de Oropesa and Jordi Solé, different characters of the short story. Made with the unity 5 engine. Features: - Titles and notifications. - Replays. - AI of different levels, good player and super-fast. - Options to control the animations. - Move the pieces with the mouse. - Play with 3 different chessboards. - Full screen option. - Sounds effects. - 5 types of AI. The Snake is the most popular new game of years!. You play a snake and you eat bananas! Is so easy to play and addictive! The different levels are: Easy, Medium and Hard! In the Easy level you will have the chance to get more bananas than the other players! Have fun eating those bananas!. The game is one hundred percent ad free!. (which is different to other Snake games, such as Snake Run or Snake Chart!) The Crystal is an puzzle/action game with a 3D effect, imagine a world where everything is made of a lot of crystals. The player is a little hero trying to survive in this hard world. The game is controlled with the mouse and you must slide the little hero in different ways trying to avoid the crystals, if you fall in a distance of 2 it's GAME OVER and you'll have to try again. The power ups are different "Crystal Powers" that can be used to use certain actions to avoid the crystals. When you complete a level there is a bonus that you'll unlock: Bonus A: 1) - Minimalist - You'll unlock a lvl 1 with almost all the rocks removed. 2) - Crystal - You'll unlock a lvl 2 with crystal symbol in the background. 3) - Mining - You'll c9d1549cdd

About This ContentWorld of Warcraft: Legion -- Goblin Goblin Zone -- Conflagration Goblin Slayer About This ContentThe latest installment of the well-established, cult classic adventure series, Goblin Slayer, set in the Goblin-infested Al-Karz region of Haggletown. Goblin Slayer is one of the few Heroes in The Far Reaches that have no allegiances to anyone but himself. His actions are guided by nothing but his own needs, desires, and greed. His sole goal is to slay the Goblins and end their terror once and for all. The lands are quiet for now, but this doesn't mean that they have come to a peace. Goblins and Ghosts continue to ravage the land in search of new prey. It's up to the Hero to protect the people and defeat the scourge. Features Inspired by traditional action-RPGs, but with a very unique art style, Goblin Slayer offers a number of interesting gameplay elements. Goblin Slayer includes a multitude of unique weapons, armor, items and equipment. Perhaps the most interesting of all is the ability to craft your own unique weapons and armor. A wide variety of secondary and special weapons and armor will be available to you throughout your journey. Every weapon and item can be enhanced by taking materials from a wide variety of sources. The materials can be found in Goblin caves, captured Goblins, corpses of fallen heroes, treasure chests in dungeons, as well as special materials which are made by certain monsters and bosses. Goblin Slayer offers a large, detailed overworld with multiple locations, multiple enemy types, and three different types of dungeons. In the story mode you have to help out the blacksmith whose shop has been attacked by a vicious

What's new in PUNIH Loader 2:

This particular text contains some information which has never been presented on the web. iBM22 (Demo Links) Author: iBM22, ©2006, Bentad.uk Back-To-Basic Version v1.0.1 - 3 July 2014 - Demo Links This is the old back-to-basics version of iBM which does not include any Easy Sports, Pro or Master modes and to restrict the audience this version has been restricted to the EU, BUT there is a work-around and you can install the expanded version without need to install any mods. If you've already installed the 'ibm-master-version-expansion', all you need to do is go to the iBM22 folder, right-click, select Properties and then select the location of your iBM22 folder and you should be away. This game requires the latest version of GTA V, which you might already have installed, and then just run the iBM22 zip file and go for a ride. All the data files automatically move to the iBM22 folder. Further in the future iBM21 will be able to use the new iBM22 folder, hopefully by that time the game will be even more easier to use. The main advantage of iBM22 is that you don't need to delete the iBM21 file, you simply replace it with the iBM22 file and continue as normal. This means that you can run both versions indefinitely. This brings with it the disadvantage that it does take a little longer to install. Unfortunately at the moment I can't do anything about the update period, sorry. iBM21 has an activation key system. This means that any players using the demo version will be automatically activated. This is clearly explained in the accompanying file, and it's important that we want to do this, since iBM21 is going to be the update to iBM22. The activation code can only be used once. When you've run out of it you can no longer activate the demo version, that would be spoiling the fun for others. As of now the iBM22 demo has only the Egretia's signature, once iBM22 has been released and reviewed then we may offer a new demo with a number of tracks to represent each city. So, to find a track within Egretia you first press S (on the first screen you can use S to search) and then go to the Track List
