Natural wood flooring is an elegant choice for indoor and outdoor spaces. The soft, pleasant feeling of nature, the timeless and sustainable ... In 2019, the Biasioli group has produced 40 products, which are in the market at the highest levels of value and attractive to consumers. The natural wood flooring is also excellent for the living space. Wooden floors - that's elegant! A wooden floor in your apartment or house is not only beautiful, but also practical, ecological and sustainable. They will last a long time, requiring no special care. In the interior of the wooden floor has its own charm. As a rule, wooden floors are made darker than the walls or ceiling. This is not only beautiful, but also practical. Dark shades of the floor are harmonious and versatile. They combine with many shades of colors. However, not every color goes with black. Therefore, when decorating the interior, you should carefully select the color palette so that it is in harmony in the room. To understand what color goes with a black floor, you need to know the general rules of color selection. General rules of color selection for the floor in order for the floor to harmonize with the rest of the interior, you need to remember a few rules of color selection. It is not recommended to choose too dark shades, because they visually reduce the space. But this does not mean that the furniture and the floor should be light. It all depends on personal preferences. For a more harmonious combination, it is worth paying attention to shades with different textures. For example, a parquet will look best on a wooden floor, and a carpet on a ceramic tile. When choosing colors, you can start from the natural lighting. For an interior with windows facing south, use light shades of wood, and for the north room, you should pay attention to dark colors. How to choose the right color of furniture for the bedroom? Choosing the color of furniture for the bedroom is a very responsible and serious matter. The color of furniture sets for the bedroom How often we make repairs in our apartment, we buy new furniture, not paying attention to whether it matches in color. And if it does not match, what should you do? If you still do not know what color furniture for the bedroom will suit you, let's look at a few options. The color of furniture in the interior of the bedroom. White color. When decorating the interior of the bedroom, you need to pay special attention to the choice of color. Since sleep is an integral part of life for any of us, it is important that the colors and shades in the bedroom contribute to soothing and relaxing. Not only the color affects our psychological state, but also the interior design of the bedroom. So, it is important not only to choose the right color scheme, but also to understand what range for the bedroom is right for you. In this material, we will learn in what colors it is better to decorate the bedroom interior.
